How to activate your warranty.

Six simple steps to register your WELZH product.

BEFORE YOU BEGIN

Have your activation code, product SKU, purchase invoice and email address ready.

STEP 01

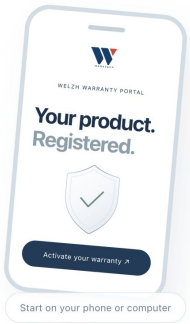

Find your activation code.

Look for the warranty label on your product or packaging. Your unique code is printed at the bottom.

Keep the label safe. Each code can be used once and is different from your product SKU.

Your unique code appears at the bottom of the label.

Start on your phone or computer

STEP 02

Open the Warranty Portal.

Scan the label's QR code or visit **warranty.welzh.com**. Select **Activate your warranty**.

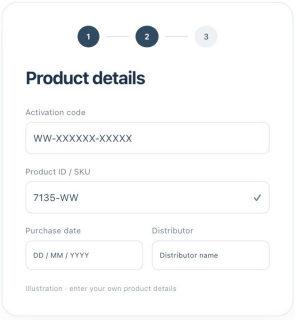

You can register on your phone or computer.

STEP 03

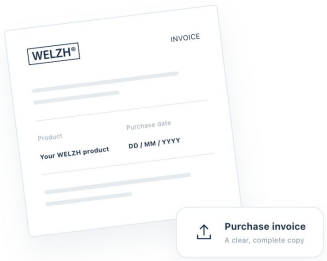

Enter your details.

Add your name or company name, email, activation code, product SKU, purchase date and distributor.

Find the SKU on your product, packaging or invoice. If the code is linked to a SKU, they must match.

Complete your registration.

STEP 04

Upload your invoice.

Upload the invoice from the distributor you bought the product from.

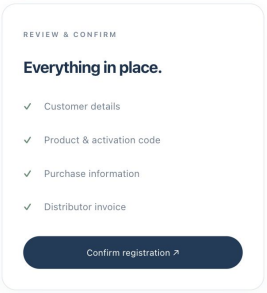

Use a complete, clear copy with readable product details and purchase date.

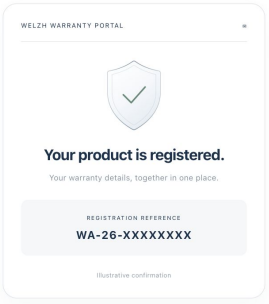

STEP 05

Review and confirm.

Check your details, especially your email address. Read the declarations, then confirm.

With a valid, unused code, your warranty is activated automatically. No manual approval is needed.

STEP 06

Check your inbox.

Your confirmation from **warranties@welzh.com** includes your reference, product and cover dates.

Cover runs for **12 months from registration**. Keep your confirmation, activation label and invoice.

Need help?

No code? Labels are being introduced on selected products; ask your distributor or our team. Code not accepted? Check the code and SKU. No email? Check spam, then contact us - do not register again.
